EDUCATION

Bachelor in Computer Science
Forman Christian College, University
08/2020 - 06/2024

Pre-Engineering
Punjab Group of College

WORK EXPERIENCE

Freelance React Native Developer
Freelance Platforms
Freelance
- Collaborated with various clients to develop mobile applications using React Native. - Created engaging user interfaces and implemented functionalities to meet client requirements.

Entrepreneurship & Innovation
Moreton Bay (Regional Council)
Internship
- - Participated in a Web /App Development Virtual Experience Program, enhancing skills in website planning and form creation.

. Digital Design & UX Virtual Experience
bp
Certificate of excellence
- Completed virtual UX internship at BP, specializing in wireframing, prototyping, and design research for digital products. Contributed to user-centered design solutions through creation of high-fidelity wireframes and interactive prototypes

Enumerator for Collaborative Research
Akhuwat Internship
Certificate: Achievement & Compensation
- My Akhuwat internship as an Enumerator provided me with valuable experience in data collection and analysis, collaborating with LUMS and Oxford University for research purposes

SKILLS

React Native   React   Agile Methodology

Rest Api Integration   Firebase Integration (Ongoing)

React-Redux   Javascript

Prototyping -Wireframing   Figma   Python

Html-CSS   Bootstrap

PERSONAL PROJECTS

Music-Fusion App
- Developed a two-screen music app, inspired by Spotify, using React Native and various libraries.
- Enhanced user engagement with ChatGPT 4 integration for dynamic interactions

Foodie-App
- Created a feature-rich food delivery app with real-time tracking and user-friendly interfaces
- Employed React Native for smooth interactions and efficient application state management.

Real-Time Weather App
- Developed the myWeather app using React Native and API integration, extracting real-time weather data directly from OpenWeather.
- API.Merged technology and meteorology insights to create a user-friendly app, presenting accurate weather information sourced from OpenWeather's API for a personalized experience.

API Integration
- Successfully integrated diverse APIs into various projects, enhancing functionality and data accessibility. Leveraged RESTful APIs to create seamless connections between applications, optimizing user experiences and expanding feature capabilities
